Safety for all

To positively impact each student's day so they arrive at school ready to learn and be inspired. It's something we're committed to doing every single day.

Vision

To be the service provider of customer's choice, be the best-in-class of the region, provide innovative and sustainable transport solutions to schools.

Mission

To provide safe and quality transport service to School and Corporate, enabling them to focus on their core activity.

Values

- A**ccountable for performance
- B**e supportive for each other
- C**ommitment to customers
- D**edicated to Safety
- E**xcellence through Innovation
- F**airness & Equal Opportunity

We take great pride in brining international best practices and technology aiming for safe and reliable transportation to the School and back home

Safety for all

TAILOR-MADE SOLUTIONS

Contract Model (10 Schools)

In the Contract Model, schools hold formal contracts with parents, directly collecting fees. Guardian One Transport, in turn, operates under a service contract with fixed rates based on bus capacity and routes, ensuring a transparent and reliable transport service.

Operational Model With Commitment (3 Schools)

This model is similar to the Fee Model, but the under this model, the schools committing to a minimal amount based on bus capacity and routes. Direct fee collection from parents is supplemented by invoicing the school for any differential amounts.

Operational Model (6 Schools)

The Fee Model empowers schools to authorize Guardian One Transport to sign direct transport service contracts with parents, streamlining day-to-day transport management. A dedicated Parent Relations Executive ensures efficient operations and direct fee collection from parents.

Treaded Approach

With the Treaded Approach, G1 takes over the operation of the existing fleet and add buses for new requirements and replacement. Over a period of time, G1 takes over the entire fleet. This collaborative model allows for seamless integration, enhancing and expanding the existing fleet over time.

Safety for all

SMART FRAMEWORK

Safe Best Practices

- Route Management Team
- Fleet Inspection Team
- Crisis Management Team
- Pre-trip Inspection
- Post-trip Inspection
- Mentor Program
- Safe Student Dispersal
- Safe Travel Checklist
- Bus Code of Conduct

Management System

- Quality Management System
- Student Management Reports
- Vehicle Management Reports
- Performance Score Card
- Safety Program

Awareness & Training

- Behind the Wheel training
- Classroom Trainings for drivers & Attendants
- Safety Education for all stake holders
- Workshops
- Accident Investigation & Formal investigations
- Safety Campaigns

Risk Management

- Safety Audit of all business Units
- Risk Assessment of Route Vehicles
- Transport Staff
- Emergency Protocol & Communication
- Fire & Evacuation Drills

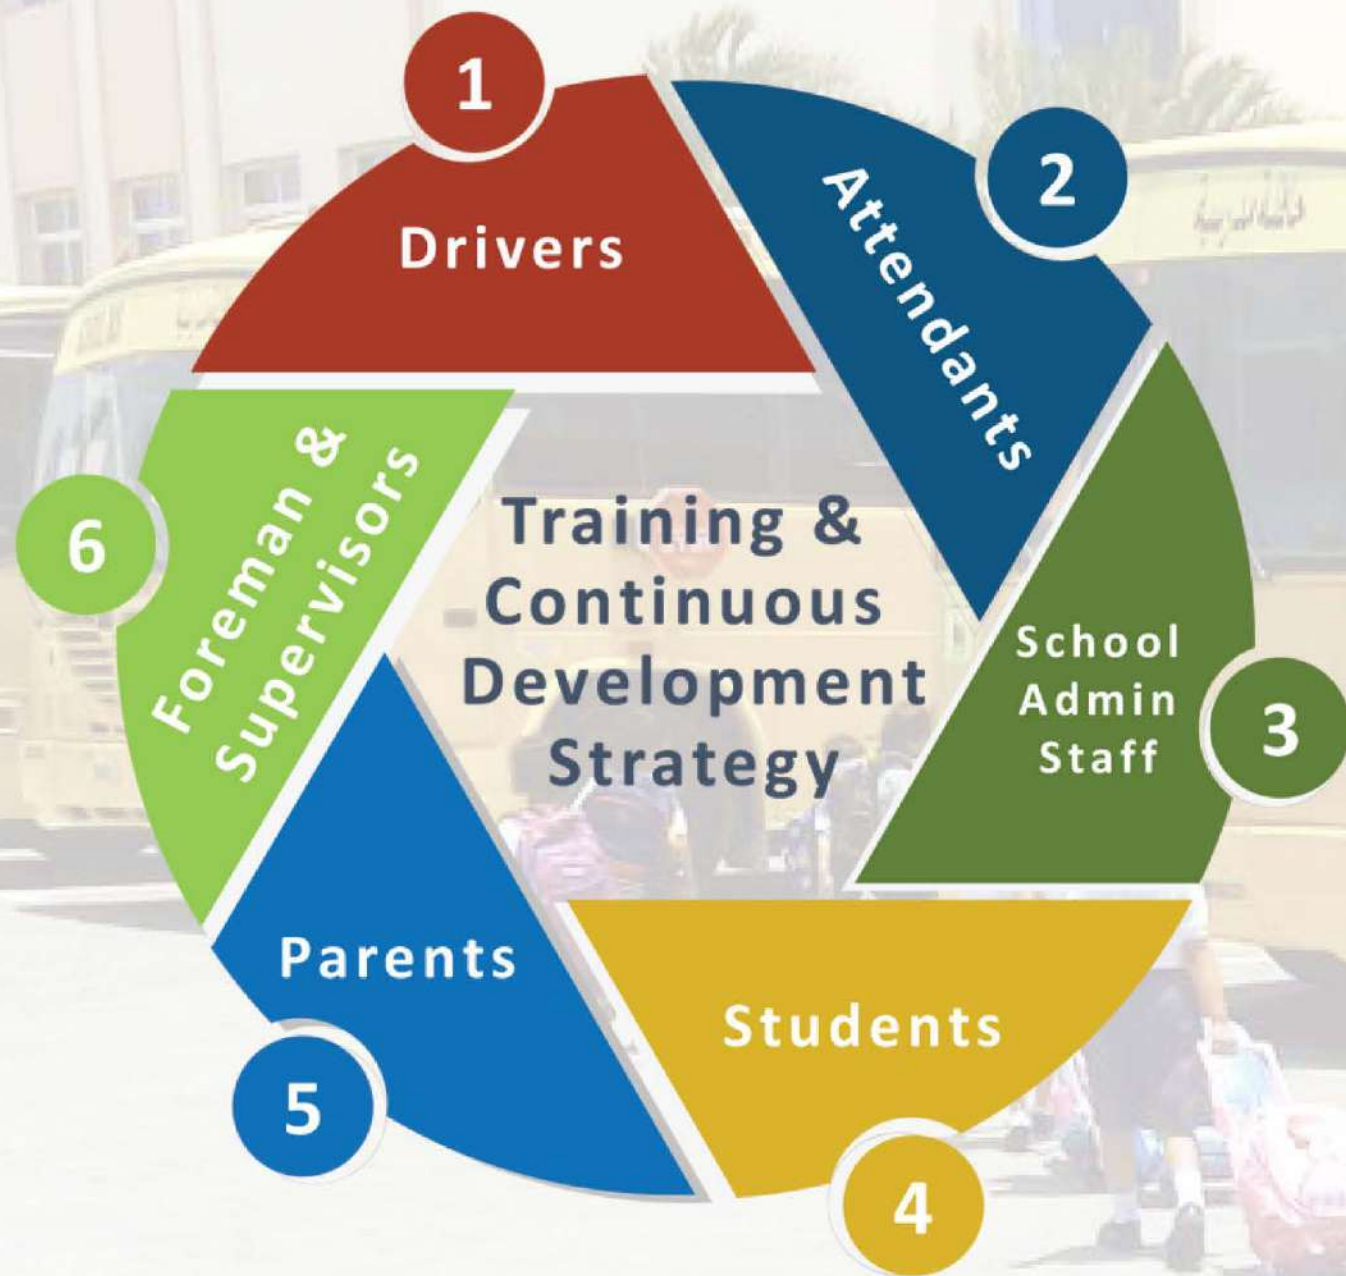

Technology

- GPS & Live Tracking
- Electronic Attendance
- Parents' App
- Video Surveillance
- Sleeping Child Prevention System
- Risk Management Centre
- Campus Entry & Exit System

Safety for all

TRAINING & DEVELOPMENT

Drivers

Pre-service; Behind-the-wheel; Defensive driving; Student Management; Crisis Management
